STREAMLINED & EFFICIENT

Millions of assessments delivered online over 15 years with a 99.9% completion rate—ask our competition for their completion rates!

NO AUTHORING REQUIRED

Let this be the last assessment management system (AMS) you and your team need to learn. Without forcing our clients to author their items, you can spend more time on administration, training and evaluation of reports and analytics.

A VETERAN AMS TEAM

TesTrac was founded and led by assessment and training professionals with decades of experience in the industry. We have seen assessments done the right and wrong ways and have developed our platform to take full advantage of that hard won experience.

24/7 SUPPORT

Our international support teams are here for assessment creation, test delivery and post-test to answer any questions for you or your participants.

TesTrac's Online Corporate Assessment Management System

- Low-Mid-High Stakes Exams, Quizzes, Observational Assessments and Surveys (*with completion certificates*)

- Over a dozen interactive question types available (*see back*)

- Real-time and detailed reports and analytics with administrative portal (*see back*)

- Integrated proctoring add-ons available (*see back*)

- Support for 39 languages, including localized date and time for administrators and participants

TesTrac Online was formed by learning industry veterans with the mission to do assessment management, delivery and reporting the right way. Our focus was to create the most streamlined and reliable assessment management system (AMS) on the market. We want to give time back to you and your team by making our solution as efficient as possible.

Most AMS platforms require significant training for you and your teams in order to learn their complex and proprietary authoring, delivery and analytics user interfaces. This means that if you have turnover, switch vendors or if the vendor has a major update, you and your teams need to start from scratch. Only 17% SaaS AMS administrators use SaaS platforms daily, with 50% of users only visiting the platform once a month, so this is a lot of time and effort for little result.

TesTrac Online has developed a different approach to assessment authoring. Rather than forcing our clients to train and learn a new authoring platform (over and over), you simply send us your assessment requirements/items and our expert team turns around an assessment within 48 hours. Once completed, we work with you to further customize the test to your requirements and preferences. Once finalized, this test is now available to be delivered to your participants.

With extensive real-time reports and analytics, as well as ability to include audio, video, images and simulations in your items, this process gives you a powerful assessment tool without the headaches of needing to be an expert at authoring.
